

## ▶ WHAT IS CROSS-JURISDICTIONAL SHARING?

Cross-jurisdictional sharing (CJS) is the deliberate exercise of public authority to enable collaboration across jurisdictional boundaries to deliver public health services. Collaboration allows communities to solve problems that cannot be solved—or easily solved—by single organizations or jurisdictions.<sup>1</sup>

With funding from Robert Wood Johnson Foundation, the Coalition of Local Health Officials held ten community meetings in late 2016 and early 2017 to learn about how to prepare communities for transitioning to a modernized public health system.
